

HOW TO

# Make your own Spy mask

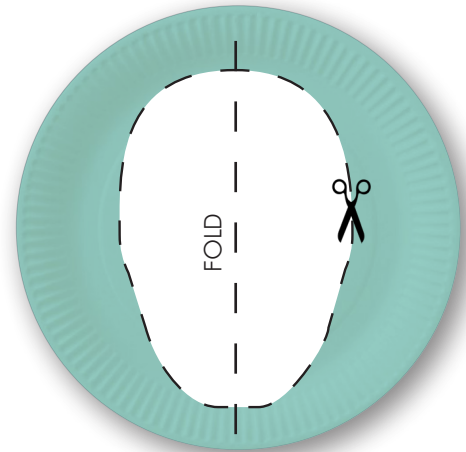

# SPY

ESPIONAGE IN AUSTRALIA

**Make a mask out of paper plates – will your family and friends recognise you? How creative can you be?**

## YOU WILL NEED

- paper plates
- pipe cleaners or chenille sticks
- coloured markers
- stickers
- glue
- sticky tape
- scissors
- yarn or string or icy pole sticks

## DIRECTIONS

1. Cut out the shape of your mask from the paper plate. Cut two holes for eyes. (Tip: fold your mask in half and mark on one side where you want your eye cuts to be. Cut out your eyeholes while the plate is folded to get two symmetrical ovals).
2. Decorate the mask. You could add ears, or a special face, maybe some fancy dots or glasses. What about a beak or a mane?
3. Punch two holes at the side near where your ears will go, and thread some yarn through each hole. Tie the two pieces of yarn in a knot at the back to keep the mask around your face. Or stick on an icy pole stick to hold the mask up in front of your face like a puppet.
